## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28,85-91, drawn to an implant material, classified in class 424, subclass 422.
- II. Claims 29-56,92-100, drawn to a method of implanting a disc implant in disc nucleus, classified in class 623, subclass 17.16.
- III. Claims 57-84, drawn to plugging an intervertebral disc annulus hole with an implant, classified in class 606, subclass 213.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process that does not implant the material in intervertebral disc space, but could be used as an annulus for meniscal repair.

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process that does not plug a hole of intervertebral annulus, but is implanted between vertebrae within spinal prosthetic plates or a cage.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Specie I: Fig. 2.

Specie XI: Figs. 29,30.

Specie II: Fig. 3.

Specie XII: Figs. 31,32.

Specie III: Figs. 5-8.

Specie XIII: Figs. 33,34.

Specie IV: Figs. 9-12.

Specie XIV: Figs. 35,36,38.

Specie V: Figs. 13-15.

Specie XV: Fig. 37.

Specie VI: Figs. 16-19.

Specie XVI: Fig. 39.

Specie VII: Figs. 20-23.

Specie XVII: Fig. 40.

Specie VIII: Figs. 24-26.

Specie XVIII: Fig. 43.

Specie IX: Fig. 27.

Specie XIX: Fig. 44.

Specie X: Fig. 28.

Specie XX: Fig. 46.

Specie XXI: Fig. 47.

Specie XXII: Fig. 51.

Specie XXIII: Fig. 52.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Timothy Thomas on 9/30/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian E. Pellegrino whose telephone number is 571-272-4756. The examiner can normally be reached on M-Th (7:30am-5pm) and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
